

Hi hello, glad to see you're interested in my zine.

If you'd like to print it, and share it around, here is what settings your printer should be at, and how to put the zine together right.

Page order:

1. Page: The door that says welcome, is the front page, should be on the outside.
2. Page: The sidewalk is the second page, should be on the first page inside the zine when you fold it. Left on the inside.
3. Page: The toilet is the third. Should be on the right on the inside when folded.
4. Page: Cobblestone is the back page when folded.

Printer settings: (at least on my printer, HP Photosmart 6520 series)

- Landscape
- A4
- Colour
- Print on each side of one paper, but NOT double sided setting.
 - Print first side on one side
 - Then set it to print again on the other side.

Assemble guide:

- Fold it across the middle.
- Tada, a zine!
